In the evening of February 12<sup>th</sup>, [REDACTED]  
and I walked out on the fire escape of the building where I work. Something very bright caught our eye and we looked up and saw what I have described in the form. We looked at it for about 30 seconds to one minute. There were called the rest of the guys from my section to see it. It shone from two overlapping solid lights to one shot like Venus, and it started moving away very quickly, while doing so make many different movements and zig zags until it was out of sight. When I first saw the object it was bent straight up and started a moving very very slowly. We could tell very easily that it was varying its speed.

I swear that the above is true to the most extent that I can from my own two eyes.
